

Working session in Brussels

Alte Cgl.

D → saw Gov. De Coker, were satisfied, but Pöhl

looks in importance to Commission, but helps them along;

Pöhl's paper → writing whether need to others?

For Coker:

● he got to discuss the C without pre-prepare their position;
how do we lead them? Outcome necessary, like membership;

is any at work?

At the end of the process each member must express what is
achievable + possible!

Our paper → began with definition, not end objectives
with EMU, fiscal policy, farm up, through central

↓
w.r. to central action;

but for EMU, CR not enough;

former than 2 elements to

- : what is political possible
on the policy making
- : since 3 great political
Communities and cooperation;
all the way to dimension social

Reflection

Gov. can proceed to more complex;

task 1 x check at with coordination of policies → is it necessary or not?

What is its role,

is are its means to fulfil the role

what are its objectives?

shape of centralization, of federation

task 4 for monetary policy

same questions role, means, objectives.

for this → a number of questions, not too many;

no dilemma to be solved;

By questions of management etc + monetary policy →

1) how to do it.

four elements of future plan of report

1) should there be a number of central reports
why (needed?)

2) What is the scheme of the ECU, show the problems

3) What can be done for the benefit of
Community

4) Propose a list of steps (cannot make it more
operational for

he would

she wants / the ECU definition, in the light of the Brussels package

Practical implementation

problems

EU definition

↓

its implementation to implement

→ structural funds } have been approved until 92; D wants
budget platform } to open the discussion

on the way to EMU

3 steps → WR → mainly macro-ec, in a firm-banking manner

now → approach to int market, macro-ec. etc. financial
mechanism; emphasis of market forces

→ structural funds, better cooperation, (Brussels package)

↓

should help to dist market forces

Brussels package → sign of political will, ^{even if generalised well} macro-economic package; difficult to measure;

Review paper

of areas where the C. is important; social, technological, educational

17 - show political depth

to discussion

the change that will lead to harmonization but only on its characteristics

don't see any

proceeds to get to ECU

more unbalanced arrangements

note before a position →

Context in which the discussion takes place

1) agreed note → to recall the commitments made by Europ. Council; remove physical barriers

note → to draw a border line between ECU necessarily defined as a framework contract or a method of definition

of criteria & restrictions

to place the

remain the same at the national level + at the Gov. level
